

How Much Just on Engineering & Architectural PLANS?

At the September 11, 2014 Board of Directors meeting, the HVLA Board of Directors approved additional spending for architectural plans, engineering and cost estimates for the Hartmann Complex and Community Center project in the amounts of:

Hartmann Complex \$ 496,240

Community Center \$ 72,750

New Spending \$ 568,990

In addition to the \$116,000 already spent on architectural design work, this will bring the total for architectural-related spending for this project to \$684,990 of your dollars.

The Board vote was 5-2 to approve the additional \$568,990 in spending, with Directors Waite, Cummesky, Surber, Cameron and Haller voting in favor of approval of the contract, and Directors Fish and Greenberg against.”

The misfortune is that \$447,000.00 of this money was SPENT before Herb Fish could raise a motion to stop the bleeding of our money which he was able to do when the Board majority changed in April, 2015. And now Cameron wants Herb Fish gone.

This money was for the planning and design of the \$5-7M Hartmann Project that we now know was completely UNAFFORDABLE. Our money was wasted!
